

Dear Sir or Madam,

I am a very hard-working, very talented computer programmer, who can meet the needs of your company in terms of developing any software solutions you need built. I have a mathematics degree, a little bit of professional software engineering experience, C++/Python/PHP/JavaScript, a substantial portfolio of recent programming projects, and a very good understanding of theoretical computer science and algorithms.

Because I was out of work for over ten years due to a health issue, I am currently in a position where I am turning my free time into new computer programming skills—my aspiration is, to learn one new skill per week from internet tutorials, and add more and more items to my portfolio until I am finally hired for a job as a software developer. I am determined to succeed in my software job search.

I have excelled in math and programming since childhood. In college, I was interested in math research and game development, and took 6 computer science classes, in addition to completing the math major.

Please don't hesitate to email me (I'm not always by my phone unfortunately) to set up a phone interview! I am eager to start work in software again soon, and I hope that your company will take an interest in my capabilities and my career.

Thanks!!

Best regards,

Philip White

Resumé for Philip White
Software Developer
Email: philipjwhite2025@gmail.com
Phone: 832-417-3787

Professional Summary:

Very talented and experienced computer programmer. Years of experience doing independent programming projects. Great knowledge of undergraduate CS/math. Eager to learn new things as an ongoing lifelong learner via self-education from advanced STEM textbooks.

Education:

B.S. in Mathematics
University of Mary Washington, 2008

Online Course in "Business Strategy:
Competitive Advantage"
University of Pennsylvania, 2026

Online Course in "Retail Fundamentals"
Dartmouth College, 2026

Skills and Knowledge:

- **Please view my portfolio, at [GitHub.com/cplxphil](https://github.com/cplxphil) !**
- PHP/mysql
- Python
- C++
- JavaScript
- HTML/CSS
- Claude Code AI
- 6 undergraduate CS classes: S/W Engineering, Data Structures, Advanced Data Structures, CS Theory, Discrete Math, Game Programming
- Mathematics/Statistics

Programming Portfolio Projects:

1. Interactive chess bot
 - OOP, Python, recursive functions, C++.
2. Harvard course search HTML page with CSS
 - Python, HTML, CSS.
3. Staggered Stock Price change software
 - Math/stats, Python/numpy, working w/ files
4. Playing Card Fight game.
 - C++, parallel processing, SFML, AI
5. "Chat Rooms" app beginning
 - Web design, HTML, CSS.

6. JavaScript Next Prime calculator
 - JavaScript, cryptology, algorithms, math.
7. Inventory Management Software
 - Python, OOP, enterprise software, working w/ files, data structures.
8. AI-built JavaScript game
 - AI, JavaScript, HTML, CSS.

Work Experience:

Substitute Math Tutor: June 2026 - Present

Store Attendant: Dec 2024 - Mar 2025 and Sep 2025 - Jan 2026

Data Entry Clerk: May 2016 - Jun 2016

Software Engineer: Jan 2011 - Apr 2011
Dynamics Research Corporation

- Developed solutions in Adobe Flash for DRC to use in working with a government client.

Software Engineer: Jun 2010 - Aug 2010
TexelTek

- Presented highly innovative guidance/insights/ ideas on government contracts to colleagues.
- Complied with NDA-based requirements to protect secret information.

Substitute Teacher: Mar 2010 - Apr 2010

Risk Analyst: Feb 2009 - Oct 2009

System Safety Engineering Intern: Jun 2008 - Aug 2008
NSWC Dahlgren

- Was remarked by colleagues to be quick at learning new material.
